PROFILE 2024

Profile & Services

About Us

Rigged Box Softworks is a passionate indie Game Dev Studio based in Surakarta, Indonesia. we are focussing to create a game with element of surprise and unique gameplay. Consisting of a team of extremely passionate and talented developers.

Rigged box softworks started when we were focusing on participating in a startup incubation event in 2016. We started with two people and were led by Satriyo Aji as Co-Founder & Game Programmer and Faizal Arif as Co-Founder & 3D game artist by making an rpg game with a post-apocalyptic theme and we worked on it for 6 months but we stopped the project and focused on pursuing a career by working in another studio for a few years. Then we got a project from a local client and we started to seriously start this company until now.

Our Service

Full Game Development

Whether we start at game concept or you deliver creative direction. We stand ready to deliver full projects of the highest caliber

CO-Development

Want to increase your project's delivery velocity or to add additional features to your MVP without jeopardizing your deadlines?. We stand ready to augment your team's delivery capacity
